2015 Goals

- Our primary goal is to continue training the health professionals regarding the importance of prescribing exercise to the population and also change our own lifestyle as doctors, to an active and healthy life.
- To continue hosting the monthly workshops and training as was accomplished in 2014.

Past Accomplishments

- Provided a monthly workshop/training to physicians throughout Ecuador. To date, 233 physicians have received EIM training.
- Identification of physicians and related organization from different specialties with leadership skills.
- Contacted the university directors, coordinators and professors from the programs of health care, physical activity or university welfare, among others.
- Identification ministries' representatives.
- Contact the private industry (e.g. Coca-Cola®) companies from the food industry (e.g. Cyrano-Floralp) and the International life Sciences Institute (ILSI).
